Fullstack Academy of Code

Grace Hopper Software
Engineering Immersive
February 2018

The University of Georgia

BFA Interior Design & Dance
May 2013

UGA Cortona Italy

Studies Abroad Program

Interior & Graphic Design
Summer 2012

EXPERIENCE

Software Engineering Fellow | Fullstack Academy of Code | February 2018 – present

- Mentor 31 students on engineering concepts, white-boarding and coding best practices of NERD stack
- Conduct technical and behavioral interviews for prospective students up to 3 times a week
- Manage 3 Agile teams of junior developers from ideation to deployment acting as scrum master, technical mentor, and code reviewer

Web Developer/Graphic Designer | The Amey Agency | February 2016 – October 2016

- Developed over ten websites using HTML, CSS, JavaScript, and PHP
- Created mockups of web pages using Adobe Photoshop, Illustrator, and InDesign
- Developed marketing materials internally and for clients geared at client acquisition
- Wrote copy internally as well as for clients based on company vision and goals

Project Manager | Kings Home Furnishings and Design | July 2014 – February 2016

- Assisted clients and designers in coordination of interior furnishings and décor for more than 20 projects
- Managed project budget, furniture procurement, and client presentations
- Maintained financial tracking records for design projects
- Oversaw space planning and bid preparation

PROJECTS

Potluck | Developer/Designer | github.com/lawyatt88/Potluckv3

An app for reducing food waste on a local scale in which users barter excess food items via smart contracts and blockchain technology

- Developed with the NERD stack, Bootstrap, and Solidity
- Conceptualized user interface, built and styled front-end during a 7 day sprint
- Co-authored smart contract and mechanism for deploying contracts to private Ethereum blockchain
- Used SCRUM for agile development and participated in team-led solutions, reviewing peer's code for quality and completeness

Picspiration | Developer/Designer | github.com/lawyatt88/picspiration

Mobile application that harnesses the word predictability features of the Clarifai API to find relevant quotes based on image input

- Crafted and deployed during a 5 day sprint using React Native, Expo, React, and Clarifai API
- Explored machine learning through creation of a microservice quotes API

Choko | Developer/Designer | choko-hopper.herokuapp.com

A fully functional e-commerce application for a chocolatier in which users can browse products, create an account, purchase products, leave reviews and view past orders.

- Constructed with the NERD stack, Bootstrap, Mocha, and Chai
- Designed and implemented administrative panel allowing admins access to CRUD (create, read, update and delete) capabilities in managing stock, orders, and users
- Set up persisting cart component using Passport session

Meraki Yoga Studio | Developer | merakiyogastudio.com

A mobile responsive application for Meraki Yoga Studio in which users can see information about classes, scheduling, class packages, and instructors

- Implemented design template as the sole developer using Underscores, HTML, CSS, PHP, and Bootstrap

Wonderwall Studio | Developer | wonderwallstudio.com

Mobile responsive eCommerce application for Wonderwall Studio in which users can browse, customize, and purchase artwork

- Defined, implemented, and maintained database schema and models
- Coordinated the migration of over 2000 products from an existing system to a new database
